The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/058,268

Applicant(s)

EDWARDS ET AL.

Examiner

DOHM CHANKONG

Art Unit

2152

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 February 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 3-12, 14-23 and 25-33 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 3-12, 14-23, and 25-33 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/808)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

- 1> This action is in response to Applicant's amendment, filed 2.15.2008. Claims 1, 8, 12, 19, 23, and 30 are amended. Claims 1, 3-12, 14-23, and 25-33 are presented for further examination.
- 2> This is a final rejection.

Response to Arguments

- 3> Applicant's arguments with respect to claims 1, 3-12, 14-23, and 25-33 have been considered but are moot in view of the new ground(s) of rejection necessitated by Applicant's amendment.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 4> Claims 1, 3-12, 14-23, and 25-33 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Reed et al, U.S Patent No. 6,345,288 ["Reed"], in view of Bischoff et al, U.S Patent No. 6,718,377 ["Bischoff"], in further view of Donner, U.S. Patent No. 7,031,945.

5> As to claim 1, Reed discloses a system for enabling components to transfer data between each other, the system comprising:

a plurality of components including a first component having a data object that implements a universal data transfer interface [Figure 1 | column 7 «line 59» to column 8 «line 3» | column 105 «line 66» to column 106 «line 16» where : Reed's distribution service object is analogous to Applicant's data object];

a second component capable of receiving the data object [Figure 1 «item 32» | Figure 28 «item 1302»] and invoking the universal data transfer interface to cause a data transfer session object (DTSO) to be sent to the second component [column 98 «lines 14-24» where :the communications object is sent using the methods (interface) of the distribution service object], wherein the second component acts as an intermediary component, which facilitates transferring of the DTSO from the first component to a third component [Figure 1 | Figure 28 | column 12 «line 63» to column 13 «line 3» | column 14 «lines 43-53» | column 86 «lines 64-66» : transferring of the message object with the communications object and Reed's web server corresponds to the second component. The distribution server facilitates transferring of the DTSO from the first component (provider computer) to the third component (consumer computer)];

wherein the DTSO is capable of being invoked by the third component to transfer data between the first component and the third components [column 8 «lines 6-19» | column 17 «lines 25-28» | column 67 «lines 17-65» | column 70 «lines 51-67» where : Reed's communications object is analogous to Applicant's claimed DTSO];

Art Unit: 2100

wherein the DTSO includes instructions that enable the first component to receive asynchronous event notifications [column 14 «lines 24-56» : “notification of the provider” | column 56 «lines 15-52»];

wherein the DTSO includes instructions to return device type and operating status of the first component [column 49 «lines 21-50»];

wherein the DTSO includes instructions to enable the first component or the third component to negotiate with each other to select a transfer medium to use to transfer data based upon the type of data [column 12 «lines 44-50» | column 53 «line 54» to column 54 «line 49»]; and

wherein the components do not have a priori knowledge of each other’s domain specific interfaces and protocols [column 54 «lines 28-49»];

Reed does disclose that the second component (provider computer) is aware of the data type supported by the first component (consumer) [column 14 «lines 21-59»] and also the first component can provide means, such as special forms, for the second component to return specific types of data [column 14 «lines 26-32»]. Reed however does not expressly disclose (1) instructions to return data types supported by the first component or (2) a session is leased subject to periodic renewal by the first component at an interval of time specified by an initial lease duration parameter.

As to (1), in the same field of invention, Bischoff is directed towards a system with a provider and consumer computer (analogous to claimed second and first component, respectively) [abstract]. Like Reed, the provider and consumer are enabled to communicate with one another using a standardized interface comprised of various communication objects

Art Unit: 2100

located at the computers [column 2 «lines 14-30 and 65-67»]. To achieve this functionality, Bischoff discloses returning data types from the consumer computer that are supported by the consumer computer to the provider computer to enable communications between the consumer and provider computer [Figure 4 | column 2 «lines 20-30» | column 7 «lines 56-67»].

It would have been obvious to one of ordinary skill in the art to modify Reed with Bischoff's teachings. One would have been motivated to provide such a combination to provide a means for Reed to obtain the supported data formats and types of a consumer computer as represented by Bischoff's feature.

As to (2), Donner is directed towards a system for establishing services for mobile devices such as establishing communications sessions to a server [column 35 «lines 31-32» | column 36 «lines 1-3» | column 38 «lines 12-18»]. Donner further discloses that the session is leased subject to periodic renewal by the first component at an interval of time specified by an initial lease duration parameter [column 26 «line 64» to column 27 «line 11»]. This citation discloses that the concept of an initial lease duration parameter is a well known feature of Java.

Therefore, it would have been obvious to one of ordinary skill in the art to have modified Reed, who also discloses Java object-oriented programming in relation to data transfer sessions [column 16 «lines 23-27»], to include the functionality of the lease duration parameter as taught by Donner. One would have been motivated to modify Reed with such a feature because the parameter is useful to insure that sessions remain viable by requiring clients to persistently renew the lease on the session.

6> As to claim 3, Reed as modified by Bischoff and Donner discloses the at least one of the plurality of components sends a second DTSO to the first component to be used by the first component for receiving data transmitted from the at least one of the plurality of components [column 42 «line 31» to column 43 «line 14» | column 74 «lines 37-42»].

7> As to claim 4, Reed as modified by Bischoff and Donner discloses the at least one of the plurality of components receives the DTSO from the first component to be used by the at least one of the components for receiving data transmitted from the first component [column 67 «lines 18-65»].

8> As to claim 5, Reed as modified by Bischoff and Donner discloses the universal data transfer interface and the DTSO have source-specific object-oriented mobile code that can be interpreted and performed by the first component or the at least one of the plurality of components [column 8 «lines 52-64» | column 21 «lines 14-25»].

9> As to claim 6, Reed as modified by Bischoff and Donner discloses the DTSO comprises instructions to enable the first component or the at least one of the plurality of components to negotiate with each other to transfer data, to select a communications protocol configured to transfer data between each other based upon a type of data to be transferred [column 12 «lines 44-50» | column 14 «lines 39-60»].

Art Unit: 2100

10> As to claim 7, Reed as modified by Bischoff and Donner discloses the DTSO is configured to indicate completion responsive to the first component or to the at least one of the plurality of components indicating that the data transfer has completed or failed [column 85 «line 60» to column 86 «line 10»].

11> As to claims 8, 12, 19, 23, and 30, see rejection of claim 1 above, and previous rejections as set forth in the previous Office action, filed 8.22.2006.

12> As to claims 9-11, as they do not teach or further define over the previously claimed limitations, they are similarly rejected for at least the same reasons set forth for claims 1, 4 and 7.

13> As to claims 12-18 and 23-29, as they do not teach or further define over the previously claimed limitations, they are rejected for at least the same reasons set forth for claims 1-7, respectively.

14> As to claims 20-22 and 31-33, as they do not teach or further define over the previously claimed limitations, they are rejected for at least the same reasons set forth for claims 4 and 7.

Conclusion

Art Unit: 2100

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DOHM CHANKONG whose telephone number is (571)272-3942. The examiner can normally be reached on Monday-Friday [8:30 AM to 4:30 PM].

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bunjob Jaroenchonwanit can be reached on 571.272.3913. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
